

vitero inspire

Update Information (Status: 07/14/2020)

Update 07/14/2020: V2.1.1 → V2.1.2

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 07/09/2020: V2.1.0 → V2.1.1

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- The [**room selection**] in the function menu has been adjusted. An adjoining room can now be entered via the arrow symbol on the adjoining room.

BUG FIXES:

virtual team room – Other

- Bug fixes und performance improvements.

Update 06/24/2020: V2.0.9 → V2.1.0

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- You can now send private [**Messages**], which can be activated by group leaders in the [Settings] menu. You can determine the settings of the entertainment (for everyone or only for group leaders) and the type (only private or as a group). New conversations can then be started in the function menu.
- Group leaders can open the [**Forum**] for participants in the virtual room in the [Settings] menu. New topics can then be set personalized, anonymous, open or hidden. You can also lock topics so that no further posts can be added.
- Red [Information Points], also called badges, make new messages, interaction types (such as cards or sticky points) and new posts in the forum visible for participants. This is displayed with a symbol in the [Function Menu] and also within the menu.
- The view of the [**Chat**] has been revised and adjusted. Using the advanced settings, you now have the option of searching for entries or names and adapting the detailed view.
- With the help of the [**Refresh**] button at the top right corner of the room bar, each participant can now re-establish their own audio connection with a click on the left mouse button. Group leaders also have the option of updating the audio connection of all participants in the virtual room by right-clicking on the [Refresh] button.
- Within the [Settings] menu, [**Performance Options**] are available for group leaders now. In addition, you can reduce audio interference due to excessive processor utilization by deactivating several animations, in the browser reducing the refresh rate of screen sharing (from 15 frames per second to 5) and webcam (from 15 - 25 frames per second to 10) and the resolution to HD (1280 pixels x 720 pixels) is limited. The respective options can also be activated individually. The settings affect all participants in the room.

- The [**Display**] menu within the moderation case has been adjusted and revised. You can now use control elements directly in the menu without placing the media in the display area first.
- Now media can only be viewed in the [**display**] by moderators or group leaders.
- In the [**Cards**] menu within the moderation case, moderation cards are now available for (co-) moderators that can be used without starting a card query.
- Results of [**Surveys**] are now shown subsequently in the [Display] and can be called up again and placed on the display area.
- The quality of the [**Webcam**] now adapts automatically and is based on the size of the image.
- Participants get an overlay if during an active session a new speaker or microphone is plugged in.
- You can now make your password visible for a short time in the dial-in mask of **vitero inspire**.
- The access to **vitero inspire** has been adjusted so that you (depending on the browser and operating system) now have the option of using **vitero inspire** in the browser or via a Windows application file.

BUG FIXES:

virtual team room – Other

- Bug fixes und performance improvements.

Update 05/04/2020: VMS 9.8 → VMS 9.9

IMPROVEMENTS AND FEATURES:

Vitero Management System

- As of now, further intelligent links are available to make starting vitero inspire easier. The link <https://vitero.de/inspire> behaves differently depending on your environment and the possibilities you have in this environment. The links can also be supplemented with further parameters.

Below you can see the adapted, intelligent links:

- Direct start of **vitero inspire** with selection depending on the environment: <https://vitero.de/inspire/browser>
- For direct start via the browser:
<https://vitero.de/inspire/browser>
- To start the windows application file directly:
<https://vitero.de/inspire/browser>
- To start the self-test directly:
<https://vitero.de/inspire/check>

Update 04/17/2020: V2.0.8 → V2.0.9

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 04/10/2020: V2.0.7 → V2.0.8

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 04/08/2020: V2.0.6 → V2.0.7

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 04/03/2020: V2.0.5 → V2.0.6

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 03/27/2020: V2.0.4 → V2.0.5

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 03/19/2020: V2.0.3 → V2.0.4

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- In the [Help and Info] area of the Vitero Management System, the virtual team room help is now available within the user manuals

Update 03/18/2020: V2.0.2 → V2.0.3

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 03/11/2020: V2.0.1 → V2.0.2

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 02/28/2020: V2.0.0 → V2.0.1

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 02/28/2020: V1.6.6 → V2.0.0

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- The function [**Webcam**] is available in the virtual room now. You can place up to two webcam images simultaneously in the display area (on the **vitero** table). The allocation can be determined by drag & drop via the webcam object on the table bar. You can choose the desired display in the moderation case. The display size can be defined in the display area.
- The [**session recorder**] is now available for the **vitero inspire** application file. With this function, administrators and group leaders can record sessions in the virtual room. The parts of the virtual room that are to be recorded, can be determined individually (only the display area, the display area and the avatars, the entire room incl. menus). Recordings are saved on the administrator's or group leader's computer as mp4 files. Alternatively, a separate recording computer can be used and operated by remote control in **vitero**. In this case, the mp4 files are saved on the recording computer.
- The [**audio player**] is now available in the moderation case. This function allows you to play audio files (mp3) in the virtual room, that can be heard by all participants via VoIP. Participants who use the telephone dial up, cannot hear the audio files.
- The [**Avatar**] menu is now available in the settings menu. Participants can edit their displayed name and take a picture of them using their webcam. Adjustments can be saved temporarily for one session or permanently in the **vitero** user account.
- Cards and sticky points can now be used in the screen sharing function (when started in the browser) and in survey results.
- When using the screen sharing function via the **vitero inspire** application file, the size of the displayed window is automatically adjusted, if the **vitero** zoom level is changed.
- A new awareness element has been added, that allows the moderator to see overlay dialogs of participants (e.g. that appear with a cards or points query). This awareness element is displayed on the avatar and is visible for all participants.

- When entering the virtual room via a new user account or session code, data protection notices are displayed.

Vitero Management System

- Customer administrators can now upload their own logo in the configuration area in the Vitero Management System. The logo appears in the upper left corner in **vitero inspire**. Already uploaded logos in **vitero essentials** are also displayed.

BUG FIXES:

virtual team room – all environments

- Various drag & drop objects have been optimised.
- In surveys, abstentions are also displayed in the bar chart.

virtual team room – Other

- Bug fixes und performance improvements.

Update 01/23/2020: V1.6.3 → V1.6.6

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 01/22/2020: V1.6.2 → V1.6.3

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 01/15/2020: V1.6.1 → V1.6.2

IMPROVEMENTS AND FEATURES:

virtual team room – Client

- Via the following link (<https://vitero.de/start?s=selftest>), the self-test can now also be reached via the **vitero inspire** application file.

Update 01/08/2020: V1.6.0 → V1.6.1

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 12/20/2019: V1.5.0 → V1.6.0

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- The **Survey (Multiple Choice)** function is now available in the moderation case menu. Therefore, you can create some new surveys or select queries that you`ve already created and distribute them to your participants in the room. You also have the choice between different answer options and -schemes, presentation and sorting options for your results. Also, you can import or export your created queries.
- For a better overview of the available functions in the virtual team room, some layout adjustments were made in the moderation case menu.
- A **self-test** tab is now available in the dial-in screen for **vitero inspire**. This allows you and your participants to check the connection to the server, select your loudspeaker and microphone and adjust the volume and the microphone level.

virtual team room – iPadOS, iOS and Android

- The beta status for iPadOS, iOS and Android have been removed.

Vitero Management System

- In the „to the virtual team room“ section in the Vitero Management System, you can now find the links to the various **virtual team room** access points (browser access, **vitero starter** and download of the application file for Windows).

BUG FIXES:

virtual team room – all environments

- Bug fixes und performance improvements.

Update 11/29/2019: V1.4.2 → V1.5.0

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- The **vitero Corporate Café** is now available as a new license model. The **Corporate Café** is a virtual room, which can be used e.g. for informative meetings, spontaneous consultation or organised learning. It is open round the clock. Participants meet in one of the **vitero** adjoining rooms. The Café can be licensed individually or additionally to a **Corporate Room**.
- Moderators can now also be selected to participate in a card or point query. You can activate this option in the menus “cards” and “sticky points” in the toolbox.

virtual team room – Google Chrome

- The Screen Sharing function via the Google Chrome browser can now be used without the **vitero** extension “**vitero** Screen Sharing”. This way, the functionality is similar to the Mozilla Firefox browser, which also does not require an extension.

virtual team room – Safari on macOS

- The Screen Sharing function is now available via the Safari browser on macOS (version 13.0 or higher). No installation or addition of an extension required.

BUG FIXES:

virtual team room – all environments

- Bug fixes und performance improvements.

Update 10/31/2019: V1.4.1 → V1.4.2

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 10/29/2019: V1.4.0 → V1.4.1

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 10/18/2019: V1.3.3 → V1.4.0

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Participants can now enter the virtual team room with a session code. A user account is not necessary.
- 20 different marking points are now available in the tool menu. Moderators can put marking points directly on the slides or start a points query, so that every participant can position marking points.
- Moderators can now use a referencing tool, which can be used via the media display. Form and colour of the referencing tool can be adjusted.
- Group leaders can now adjust the display of the name tag in the virtual room for all participants in the setup menu. The following combinations are available: name and surname, surname, name, title name and surname and title and surname.
- Pages, that can be clicked through, are displayed in the dialog of the room selection. This way, all unbooked groups can be seen.
- The notice dialog, which informs the participants about a new card query, disappears automatically when the query is completed.

- In a card query with a limited number of cards, participants can now delete one card and create a new one.
- In the text chat log, further information regarding the card or points query can be seen. Among other things, the participation in the respective query is displayed.
- Various design optimizations have been made.
- The tool and text chat symbol have been edited.
- The button for the full screen mode is now next to the zoom function.
- Moderators can create an empty slide via the media display tool.
- When using the megaphone function, an overlay with the moderator's avatar is displayed in the main and adjoining rooms, so that the participants can see who is speaking.

virtual team room – vitero application file

- When using the screen sharing function via the **vitero inspire** application file, a combined mouse / microphone symbol is available now. This gives the participant both the right to speak and edit the displayed application.

Vitero Management System

- The module **vitero monitoring+** is available, which extends the function of the module **vitero monitoring** with the automatic allocation of credit points. This way, you can evaluate the attendance time of the participants in a **vitero** session. The award of points can be individually determined (e.g. the participant receives one credit point, when attending at least 80 % of a session). The optional recording and evaluation of the active participation is not yet available.

BUG FIXES:

virtual team room – all environments

- Bug fixes und performance improvements.

Update 10/14/2019: V1.3.3 → V1.3.4

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 09/17/2019: V1.3.2 → V1.3.3

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 08/19/2019: V1.3.1 → V1.3.2

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 08/09/2019: V1.3.0 → V1.3.1

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Bug fixes and performance improvements.

Update 08/02/2019: V1.2.0 → V1.3.0

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- As a team leader you can activate a card query in the tools menu for all participants. You can choose between open or closed and personalized or anonymous queries. Besides, participants can choose the colour and shape of their cards.

- The option to change your password is now in the login mask below the input fields for the login data.
- There is a full screen button in the room's bar on the right side next to the zoom control, which hides the browser address bar and the task bar and therefore enlarges the virtual table. This mode can be closed via the mentioned button or individually via the used browser.
- Group leaders receive a warning 15 minutes before the end of a session, that the virtual room will be closed in a few minutes.
- In the audio menu, the list of your devices is always updated, both when devices are inserted or unplugged.
- When the microphone level is "0", no sound waves are visible on the user's avatar.
- The font size of the name tags has been enlarged for better readability.
- The settings menu (left-hand side panel) now contains pictograms next to the submenus.
- Regulators like those in the setup menu are now highlighted in green, when active.

BUG FIXES:

virtual team room – all environments

- The number of users, that are already in a group, can be seen in the room selection. This function has been improved.

A bug, which caused, in rare circumstances, a false display of the opening time, has been fixed.
- Improvements for editing and sending messages via text chat.

virtual team room - Other

- Further bug fixes and performance improvements.

Update 06/26/2019: V1.2.0 → V1.2.1

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- Further bug fixes and performance improvements.

Update 05/31/2019: V1.1.3 → V1.2.0

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- With the Firefox browser, moderators and co-moderators can now use the screen sharing function. No extension is needed.
- Participants can open links, which are sent via text chat.
- The beta status for the Safari browser has been removed. Please find further information in the current [system requirements](#).
- The colour coding of the moderators' name tags has been adjusted for better readability, when moderator and co-moderator share applications at the same time in the flexible screen sharing display.
- Group leaders can now deactivate the function Push-to-Talk in the settings menu of the virtual room.
- Further access numbers have been added for the telephone dial-in (Chile, Slovakia and Slovenia).
- The display of the microphone controller has been adapted in the audio menu and in the participant list. If access to the microphone is not allowed, the controller for the microphone level is no longer displayed. If a participant uses the Firefox browser, in which the control of the microphone level is not possible, the regulator of the microphone level is greyed out.

BUG FIXES:

virtual team room – all environments

- A loading animation for the media display in the participant list has been added, which allows the users to check if all

participants can see the presented slides or if the loading process is still in progress.

- In addition to the file format JPG, JPEG files can also be displayed in the virtual room.
- A bug in the starting process of the screen sharing function, which sometimes caused a short-term transmission of a previously shown image, has been fixed.

virtual team room - Other

- Further bug fixes and performance improvements.

Update 04/02/2019: V1.1.2 → V1.1.3

IMPROVEMENTS AND FEATURES:

virtual team room – all environments

- A further zoom level is available now (3 levels in total). When using the third level, the **vitero** frame disappears, so that a full screen can be displayed.

Update 02/21/2019: V1.1.1 → V1.1.2

BUG FIXES:

virtual team room

- Further bug fixes and performance improvements.

Update 02/18/2019: V1.1.0 → V1.1.1

BUG FIXES:

virtual team room

- Further bug fixes and performance improvements.

Update 02/15/2019: V1.0.5 → V1.1.0

IMPROVEMENTS AND FEATURES:

Vitero Management System

- The Event Manager can be used in **vitero** inspire, if the module is assigned to the customer.

virtual team room – all environments

- A participant's headset, microphone and volume settings can be saved for future sessions now.
- As soon as the booking time (incl. buffer time) of a session is over, all participants are removed from the virtual room.

BUG FIXES:

virtual team room

- Text messages displayed with „...“ in detail levels M and S, can be enlarged with a mouse hover.
- When screen sharing is active, the virtual mouse can also be taken back via the ESC button.
- The screen sharing of the Chrome Extension can be closed via the button “stop sharing”.
- If participants use Firefox and have open microphone channels, the sound waves can now be displayed as they speak.
- If a team leader is in an unbooked room before the session starts, the room is updated so that the set room size and the telephone can be used.

virtual team room - Other

- Further bug fixes and performance improvements.

Update 02/04/2019: V1.0.4 → V1.0.5

BUG FIXES:

virtual team room

- Further bug fixes and performance improvements.

Update 01/28/2019: V1.0.3 → V1.0.4

BUG FIXES:

virtual team room

- When entering the **vitero** room it no longer happens that symbols and graphics cannot be displayed.

virtual team room - Other

- Further bug fixes and performance improvements.

Update 01/18/2019: V1.0.1 → V1.0.2

NEW FEATURES:

Vitero Management System

- You can now send a customized email template via the Vitero Management System when you activate **vitero inspire** in the appointment booking. This template contains the necessary links to start **vitero inspire**.
- When creating an appointment, you can now generate a browser link **for vitero inspire** in your email with the parameter [inspireurl].

EDITED FEATURES:

virtual team room

- Participants can see unbooked rooms on the day of the session. However, only group leaders can enter unbooked rooms.

BUG FIXES:

virtual team room

- A bug in the referencing tool has been fixed, which caused an incorrect display of the menu and the inactivity of various functions in the virtual room.
- A bug in the Media Display has been fixed, which blocked the use of the room functions. Now, two moderators can present slides at the same time.

virtual team room - Other

- Further bug fixes and performance improvements.
